

CLAFLIN

HANDHELD TECHNOLOGY

The Claflin Company partnering with **SUPPLYHAWK**  has developed a process utilizing bar code technology to perform on-site inventory and replenishment.

Some advantages you will see:

- **Increase Revenue**

Improve management and reimbursement of supply costs and resident services.

- **Cut Costs**

Manage inventory and purchase orders more effectively.

- **Gain Control**

Track supplies throughout multiple facilities with centralized ordering.

Purchase Order Management

Handheld technology gives you one easy system to order, track and receive products from multiple vendors. These handhelds were designed specifically with healthcare facilities in mind to help run operations more smoothly, saving time and money.

Better information, better care, better service...
