

Testimonials from NaturCare Users

Yale New Haven Hospital – New Haven, CT

Ronelle – RN

We deal with many different odors stemming from some really unsavory sources. I can honestly say the NaturCare works and our patients and staff really like the product. It's a cheap price to pay for everyone's happiness!

Hasbro Children's Hospital (LifeSpan) – Providence, RI

Nancy – RN

NaturCare has been great. We have had positive feedback from the families and staff!! We use the 2 oz. size for patient care and 16 oz. bottles for our diaper room odors.

Fairview Hospital/Berkshire Medical System – Great Barrington, MA

Gerry – Director Infection Control

Clinical staff love the products!

O'Connor Hospital – Delhi, NY

Melissa – RN/ Emergency Department

I found this deodorizer to be very effective in eliminating a majority of odors present in the Emergency Room (air, beds, feet, garbage). The smell is very light and not offensive like other products. This works well especially when we have respiratory patients.

The Valley – Ridgewood, NJ

Pat – WOCN

We are in the process of educating staff on the many uses for NaturCare and it's been received well by staff and patients. I gave a bottle to an ostomy patient yesterday who loved it and was anxious to be able to buy more NaturCare for use after leaving the hospital.

Unity Hospital – Rochester Regional – Rochester, NY

Jennifer – CNO

Staff continues to use the products and seem to like them. I have not heard otherwise!

Hunterdon Hospital – Flemington, NJ

Cori – RN

Everyone is asking for and loving the NaturCare Fresh Mint. We are using it for foul odors in the patient rooms and in the hallway mostly. So glad it's finally available for us to use!

Byron Health Care Center - Fort Wayne, Indiana

Karen - Nursing Supervisor

Over a two month period of time, we used NaturCare on and around 10 patients who were terminally ill. We sprayed it on intact skin on their legs and private areas that was soiled from urine or feces and on secondary bandages that smelled bad. We did not spray it directly on the wounds, but used it where there was wound or incontinent odor and found it to be very effective. It also got rid of odors on their soiled bed clothing and the air in the room which greatly improved the room situation.

McPherson Hospital – McPherson, KS

Tonya – Nurse Mgr. Med Surg

We love this product. We use it mostly on bodily fluids. It is amazing. It gets rid of the odor instead of just covering it up or adding to the smell. Plus it smells great!

Massachusetts Health & Hospital Association

Lorraine – Senior Director, Clinical Affairs

At our healing meeting, the committee loved the NaturCare natural deodorizers! We have decided to replace all our current air fresheners at our administrative offices. Two of our staff also got stains out of their clothes before having to go into a meeting!

Quality of Life (Ostomy) Organization

Velma – RNWOCN

As an RNWOCN, I've seen my share of fragrance driven odor eliminators but not all work effectively - they just provide a fragrance but the real odor remains. I find this to be untrue with NaturCare: it provides odor elimination and a nice essential oil aroma. I think I like the lemon best- but they all work very well, effectively and pleasantly. As an ostomy patient and nurse, I am always looking for and willing to test products such as those by Nature Plus.

Diagnostic Endoscopy – Stamford, CT

Geri – Nurse Administrator

For the last 3 years, we have been using NaturCare in the air as needed during and/ or after colonoscopies. We like Orange/Grapefruit, Mint, Lemon and Lavender!

Mother – Behavioral Health Patient

Louise – Bridgeport, CT

Life with a son who has chemical imbalance is challenging everyday and emotionally charged. He was readmitted to the psychiatric unit at Bridgeport hospital last Sunday and I was distraught to be there once again – but knew we needed help. We waited anxiously for the doctor. Within a couple minutes a nurse, smiling broadly, came into the room spraying NaturCare Orange/Grapefruit. Between her happy demeanor and the wonderful “gift for our noses” – it changed the whole mood of our experience! Thank you.... thank you!

Ron – Shelton, CT

Patient

Life with a colostomy has been challenging – health, time and odor-wise. Leakage especially at inconvenient times is disheartening -- even a little bit has to be taken care of especially from a smell and “feeling clean” standpoint. I am so glad that I found NaturCare early on because I can quickly deodorize my soiled support appliance, fabric barrier attachment & skin quickly & discreetly without having to do a full wash/change. I have also used on tissues & used bag I discard by my bed.
